Second Fiscal Year

FY2025 Activity Report

April 1, 2025 – March 31, 2026

World in Peace (WiP)

1. Key Achievements of FY2025

(1) Expanding Humanitarian Assistance in Japan and Abroad

We responded to disasters in Japan and overseas, including the earthquake in eastern Afghanistan and the large-scale wildfire in Ofunato, Iwate Prefecture, working with local organizations to support affected communities. In Cambodia, we also provided educational and hygiene supplies to 28 community preschools, helping improve learning environments for young children.

(2) Nearly Doubling Revenue from Product Sales

We continued selling fair trade products and introduced baked goods made at Atelier Yu no Ie, a welfare facility in Sakai, Osaka. Revenue from product sales increased from ¥143,600 in the previous fiscal year to ¥277,966 in FY2025. By diversifying our products, we expanded opportunities for more people to engage with social issues through everyday purchases.

(3) Launching a Redesigned Official Website

We redesigned our official website to communicate our activities and support achievements more clearly. As a young organization, we believe that transparent communication and accessible information are essential to building trust with our supporters and partner organizations. The redesigned website provides a stronger foundation for sharing our work, strengthening partnerships, and encouraging broader support for our mission.

Disaster Relief

Japan	Program Name	Ofunato Wildfire Response, Iwate Prefecture
	Activity Period	March 2, 2025 – August 21, 2025

[Program Overview]

On February 26, 2025, a major wildfire broke out in Ofunato, Iwate Prefecture, burning approximately 3,370 hectares—around 10% of the city—and damaging 102 buildings, including fisheries-related facilities. The fire disrupted residents' daily lives and livelihoods, including those whose homes were not directly damaged but who lost workplaces, equipment, or income.

To support affected residents, World in Peace provided financial assistance to Ofunato Yoriso-i Mirai Net, a local organization conducting consultation and outreach activities. The funding covered necessary expenses for responding to inquiries and visiting temporary housing and residents' homes to identify their needs.

The organization received more than 50 consultations, excluding visits to temporary housing and information sessions at evacuation shelters. Many residents faced financial difficulties due to the loss of warehouses, fishing equipment, and income, even when their homes remained intact.

The organization also shared residents' concerns and support needs with the Iwate Prefectural Government and Ofunato City, contributing to the establishment of a new financial assistance program for people not adequately covered by existing schemes. In May 2025, a consultation desk was opened at Ofunato City Hall, further strengthening local support for affected residents.

Location	No. of Personnel	Beneficiaries	Expenditure
Ofunato, Iwate Prefecture	5	106	JPY 70,000

*Approximately 50 consultations were conducted through this project. Assuming each consultation supported one household, the estimated number of beneficiaries was calculated using Ofunato's average household size (31,032 residents ÷ 14,686 households ≈ 2.11 people per household).

Afghanistan	Program Name	Eastern Afghanistan Earthquake Response
	Activity Period	September 1, 2025 – November 26, 2025

[Program Overview]

At 11:47 p.m. local time on August 31, 2025, a magnitude 6.0 earthquake struck eastern Afghanistan, killing more than 2,000 people and affecting approximately 500,000.* In response, World in Peace partnered with local organization LEARN Afghan to provide emergency humanitarian assistance, focusing on medical care and hygiene to protect the lives and health of affected communities.

Medical support included examinations, health assessments, follow-up care using diagnostic equipment such as portable ultrasound devices, and the distribution of essential medicines. Patients requiring advanced care were referred to nearby medical facilities. The project also provided hygiene support to help prevent infections and reduce health risks caused by deteriorating sanitary conditions after the disaster.

Recognizing the significant restrictions women and girls face in Afghanistan, including in education, employment, and freedom of movement, the project also prioritized their health and protection. Female doctors and nurses joined the response team, helping create an environment where women and girls could access medical consultations and care with greater confidence and comfort.

Through this project, World in Peace helped improve access to medical care for earthquake-affected communities while supporting infection prevention and efforts to reduce post-disaster health risks.

Child and Education Support

Cambodia	Program Name	Cambodia Education Support
	Activity Period	August 25, 2025 – January 23, 2026

[Program Overview]

In rural Cambodia, community preschools play an important role in providing early childhood education, but access to learning materials and hygiene supplies remains essential to sustaining their activities. Working with a local community organization, World in Peace provided educational and hygiene supplies to 28 community preschools to help create a safe and healthy learning environment for young children.

Supplies included paper, scissors, glue, pencils, crayons, picture books, floor mats, toothbrushes, toothpaste, and one month's supply of healthy snacks. These items supported daily learning activities and helped promote healthy hygiene habits.

The preschools primarily serve children aged 3–5, with an average of approximately 25 children per class. Through activities such as letter practice, storytelling, coloring, and creative play, children develop foundational learning skills. Songs, physical activities, and group play also help foster physical development and social skills. Healthy snacks and toothbrushing routines provide opportunities to learn basic health and hygiene practices.

Early childhood education provides an important foundation for a smooth transition to primary school and continued learning. Through this project, World in Peace supported 28 community preschools by providing essential educational and hygiene supplies, helping strengthen early childhood education in rural communities.

Angkor Thom District, Siem Reap Province, Cambodia	2	702 people (+unspecified number of others)	JPY 105,462

Events and Awareness-Raising Activities

Japan	Program Name	Ethical Sales and Awareness-Raising Activities
	Activity Period	November 15, 2025; May 23, 2026

[Program Overview]

World in Peace conducted awareness-raising activities through product sales to promote understanding of fair trade and social welfare, encouraging people to connect everyday purchasing decisions with addressing social issues.

Continuing from the previous fiscal year, we sold Tony's Chocolonely chocolate to raise awareness of issues such as child labor and inequality in the cocoa industry. We also introduced baked goods made at Atelier Yu no Ie, a welfare facility in Sakai, Osaka. The sales helped support wages for people working at the facility and the continuation of its activities, while a portion of the proceeds was allocated to World in Peace's international humanitarian assistance.

By connecting everyday purchases with support for producers, people working at welfare facilities, and international humanitarian efforts, the project encouraged people to reflect on social issues and take action through their daily choices.

Location	No. of Personnel	Beneficiaries	Expenditure
Senri & Osaka International Schools of Kwansei Gakuin	23	None directly reported	JPY 275,823

Financial Report

In FY2025, total revenue was ¥868,729, an increase of 19.3% from the previous fiscal year. The overall revenue structure remained largely unchanged, with general donations continuing to be the main source of income. Revenue from fair trade and other product sales increased significantly, from ¥143,600 to ¥277,966. In the second year of our fair trade initiative, this growth was likely driven by an increase in repeat customers and a wider selection of products.

However, general and designated donations showed little growth compared with the previous year. Building a more stable donation base remains essential to sustaining our activities and ensuring sound organizational operations. General donations, in particular, can be used flexibly across our activities, including unexpected emergency responses such as the eastern Afghanistan earthquake relief effort.

Total expenses reached ¥1,038,397, an increase of 122.8% from the previous fiscal year. While direct relief expenses did not increase significantly, higher procurement costs for fair trade products and increased outsourcing costs were the main factors behind the rise in overall expenditure.

In our fair trade initiative, inflation and exchange-rate fluctuations increased procurement costs. As purchase prices for chocolate products rose substantially, we absorbed part of the increase to limit its impact on selling prices. In addition, external factors such as weather reduced event attendance, leaving some purchased products unsold and causing procurement costs to rise ahead of sales revenue.

We also rebuilt our website after technical issues affected the previous system. In response to feedback about mobile usability and the ease of making donations, we outsourced the redevelopment to strengthen our long-term operational infrastructure. This resulted in higher-than-expected expenditure.

As a result, net assets decreased by ¥169,668 in FY2025. We continued our activities using net assets carried forward from the previous fiscal year, leaving ¥92,110 in net assets carried forward at year-end.

Going forward, we will strengthen project-level budgeting and expenditure planning while prioritizing a more stable revenue base capable of supporting both ongoing activities and unexpected emergencies. Alongside ensuring that donations are directed appropriately to those in need, we will continue developing independent sources of income, including fair trade sales, to build a sustainable financial foundation.

Funds raised through donations and program revenue that are intended for activities in subsequent fiscal years will be carried forward and used to support our continued work.
